Effective Date: 07/01/2020

Page: 1 of 3

I. Purpose:

To establish a protocol for ensuring that interim services are made available to pregnant women WITH A SUBSTANCE USE DISORDER (SUD).

II. Procedure:

It is the policy of LCDAC to ensure that pregnant women with an SUD who have been screened, have completed a level of care assessment, & identified as needing treatment services are offered admission to the recommended level of care **immediately** following the assessment.

In the event that the woman **cannot** be admitted **immediately**, LCDAC requires its contracted providers to arrange for interim services within 48 hours of the completed assessment.

Ongoing contact **must** occur with the pregnant woman from the completion of her LoCA until admission into treatment regardless of whether interim services have been secured and/or whether or not she has engaged in said interim services. The provider should adhere to their own written protocols outlining the required time intervals for contact with the woman until admission occurs. Documentation of said contact shall be documented in the woman's file.

Interim Services are defined as services to reduce adverse health effects of substances, to promote the health of the individual, and to reduce the risk of transmission of a disease until the individual is admitted to a treatment program. The individuals file must document that interim services were provided or arranged.
